

Flipping The Classroom

An Online Course from ideastream®

Summary: In this online course, participants will learn what teachers around the country are doing to reverse the teaching process and take advantage of the student's love for 21st century technology while adding flexibility to the school day.

Learning Objectives

Creating the Flipped Classroom Toolbox

- Create a presence on the Internet for students to use as they construct new knowledge.
- Create a blog or wiki for students to use for out of school collaboration.
- Create a video explaining a concept or activity.

Learning the current pedagogy of Flipped Teaching

- Analyze current Flipped Teaching models.
- Use the Backward Design Model to design a unit or module that incorporates one of the Flipped Teaching Models.
