

MOODLE BASICS FOR EDUCATORS

Course Summary Moodle is a Learning Management System (LMS) that allows teachers to create online learning modules with opportunities for interaction and collaboration.

Moodle can be used to create online classes that are completely online or online modules that can be blended with face-to-face experiences.

- Topics Covered**
- Getting a feel for the Moodle environment
 - Teaching with technology
 - Creating interaction
 - Tools to empower students
 - Backward design
 - Assessment Tools

The word Moodle was originally an acronym for Modular Object-Oriented Dynamic Learning Environment.
