

Concerns about Climate Change

Classroom Lesson Plans and Activities

Classroom Activity - Video "From underwater, Maldives sends warning on climate change"

Students watch video about how the Maldives fight to stay afloat

Classroom Activity – Video "Meltdown: A global warming travelogue"

For a long time -- the first 15 years that we knew about climate change and did nothing -- there were no pictures. That was one of the reasons for inaction. But now the pictures and videos are here. Students can watch this video that introduces them to the problems associated with climate change.
